

CLINICAL TRIAL ACADEMY

Essential course

Clinical trial protocol design & optimization

This program includes a fundamental education on clinical trial protocol components, hands-on protocol design, and direct interactive sessions with trial experts to deepen technical understanding of participants and enable them to develop an ideal clinical trial protocol.

10 participants

1-3 June 2022

Sitem MedTech HUB (SMH)
Bern

Day 1

- Introduction to clinical trial protocol- I
- Networking lunch
- Introduction to clinical trial protocol- II

Day 2

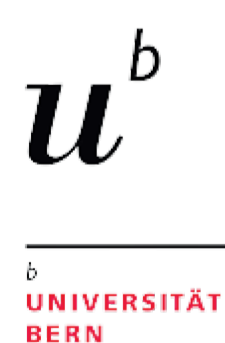

- Clinical study:
Regulatory requirements
- Clinical study:
Essential documents

Day 3

- Data-driven trial
protocol development
- Data-driven trial
protocol optimization
- Key opinion leader
presentation and
networking

Organization

The academy is a synergy of experts in the field of clinical research, joined together to offer a knowledge-sharing program to address all aspects of modern clinical trial protocol development and optimization.
