ACT now: Accuracy, Completeness, and Transparency in health research reporting

EQUATOR Scientific Symposium, 11 - 12 October 2012; Freiburg, Germany

Save the date for the scientific symposium and 4th EQUATOR Annual Lecture organised by the EQUATOR Network and the German Cochrane Centre.

The symposium will be of great interest to health research scientists and clinicians, journal editors and peer reviewers, reporting guideline developers, publishers, research funders and other professionals involved in research education, research governance and the publication of medical research.

The focus of the meeting is:

Highlight critical issues in health research reporting and its wider consequences

Present key findings from relevant scientific research; topics include:

Reporting quality of research studies in all areas of medicine

Common problems in research reporting (e.g. publication bias, selective reporting, inconsistencies between protocol and publication, misinterpretation of research findings)

Impact and consequences of poor reporting on systematic reviews and clinical guidelines, clinical practice and patients' care

Development of robust reporting guidelines

Increasing awareness and knowledge of principles of rigorous research reporting and available guidelines

Implementation of reporting guidelines in journals, and by research and funding organisations

Development and delivery of educational and training programmes on research reporting

Discuss potential solutions for improvement of health research literature and share experiences

To make sure you do not miss the event please [email](#) to register your interest.

When the call for abstracts and registration opens we will contact you directly.

More information is available on the EQUATOR Network [website](#).
